<b>Physics of Fundamental Interactions and Particles</b>	<b>1</b>
<b>1 Production and Spectroscopy of Antihydrogen</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Measurement of the Lorentz angle . . . . .	1
1.3 $\bar{H}$ production mechanism . . . . .	2
1.4 $\bar{H}$ angular distribution . . . . .	4
1.5 Outlook . . . . .	5
<b>2 Particle Physics at DESY/HERA (H1)</b>	<b>7</b>
2.1 Electron-proton collisions at a centre of mass energy of 320 GeV - summary . . . . .	7
2.2 Data taking . . . . .	9
2.3 Results from recent analyses . . . . .	9
<b>3 The DØ experiment: Search for rare <math>B_s^0</math> decays</b>	<b>15</b>
<b>4 Rare Kaon Decays at the Brookhaven AGS</b>	<b>18</b>
4.1 BNL E-865: first observation of the decay $K^+ \rightarrow e^+ \nu_e \mu^+ \mu^-$ . . . . .	18
4.2 KOPIO: a study of the CP-violating rare decay $K_L^0 \rightarrow \pi^0 \nu \bar{\nu}$ . . . . .	20
<b>5 Ultra Cold Neutrons</b>	<b>24</b>
5.1 A measurement of depolarization and loss probabilities of stored UCN . . . . .	24
5.2 Characterization of diamond-like carbon coatings . . . . .	25
5.3 Simulation of ultracold neutron experiments using GEANT4 . . . . .	26
<b>6 Precision Measurements in Rare Pion Decays</b>	<b>28</b>
6.1 The $\pi^+ \rightarrow e^+ \nu_e \gamma$ anomaly . . . . .	29
6.2 A precision determination of the $\pi^+ \rightarrow e^+ \nu$ branching ratio . . . . .	29
<b>7 High-precision CP-violation Physics at LHCb</b>	<b>32</b>
7.1 Introduction . . . . .	32

7.2	The LHCb experiment . . . . .	32
7.3	Silicon tracker . . . . .	33
7.4	TT station . . . . .	34
7.5	Prototype tests . . . . .	35
7.6	Preparation for the module production . . . . .	36
7.7	Readout system . . . . .	36
7.8	Simulation studies . . . . .	37
<b>8</b>	<b>Particle Physics with CMS at the LHC</b>	<b>39</b>
8.1	Physics programme . . . . .	39
8.2	Performance tests of the silicon pixel detector . . . . .	40
8.3	Charge collection as a function of depth . . . . .	42
8.4	Lorentz angle as a function of depth . . . . .	43
8.5	Position resolution . . . . .	44
8.6	Mechanical support structure . . . . .	45
8.7	Pixel power distribution . . . . .	45
8.8	Event reconstruction software . . . . .	46
	<b>Condensed Matter Physics</b>	<b>49</b>
<b>9</b>	<b>Superconductivity and Magnetism</b>	<b>49</b>
9.1	Studies of isotope effects in novel superconductors . . . . .	49
9.2	Studies of pressure effects in novel superconductors . . . . .	52
9.3	Spectroscopic studies of novel superconductors . . . . .	54
9.4	Electric field effects in perovskites . . . . .	58
9.5	New developments in instrumentation . . . . .	59
<b>10</b>	<b>Phase transitions, thermal transport and new materials</b>	<b>61</b>
10.1	Physics of superconducting thin-film nanostructures . . . . .	61
10.2	Thermal conductivity and heat-capacity experiments . . . . .	64
10.3	Bose-Einstein condensation of magnons in $\text{TlCuCl}_3$ ? . . . . .	64
10.4	Vortex phases in type-II superconductors . . . . .	65

<b>11 Surface Physics</b>	<b>67</b>
11.1 Electronic structure of a two-dimensional liquid metal . . . . .	69
11.2 Spin polarized surface states on a kinked vicinal Au(111) surface . . . . .	70
11.3 <i>h</i> -BN on Rh(111): a stable nanomesh . . . . .	72
11.4 Hexagonal Boron Nitride on Pd(111) - Nanomesh or Moiré pattern? . . . . .	73
11.5 Time-resolved photoelectron spectroscopy from <i>h</i> -BN/Ni(1 1 1) . . . . .	74
11.6 Unusually large HOMO dispersion in one-dimensional C <sub>60</sub> chains . . . . .	76
11.7 Chiral Heterorecognition: Cysteine on Au(17 11 9) <sup>S</sup> . . . . .	77
11.8 Time-resolved electron diffraction . . . . .	78
<b>12 Physics of Biological Systems</b>	<b>82</b>
12.1 Studies of single DNA molecules in liquids . . . . .	82
12.2 A new quantum mechanical principle to reduce radiation damage in electron microscopy . . . . .	86
12.3 Structure of individual Bio molecules . . . . .	90
12.4 A solid electrolyte ion source . . . . .	91
<b>13 Computer Assisted Physics</b>	<b>94</b>
13.1 Effects of strong correlations on the spin susceptibility . . . . .	94
13.2 Suppression of critical properties in doped cuprates . . . . .	94
13.3 Charge and spin density distributions around Zn impurities in cuprates . . . . .	96
13.4 Re-assessment of NMR data in the cuprates . . . . .	97
 <b>Infrastructure and Publications</b>	 <b>100</b>
<b>14 Mechanical Workshop</b>	<b>100</b>
<b>15 Electronics Workshop</b>	<b>103</b>
<b>16 Publications</b>	<b>105</b>
16.1 Research group of Prof. C. Amsler . . . . .	105
16.2 Research group of Prof. H.-W. Fink . . . . .	108
16.3 Research group of Prof. H. Keller . . . . .	108
16.4 Research group of Prof. P. F. Meier . . . . .	112

16.5 Research group of Prof. J. Osterwalder . . . . .	112
16.6 Research group of Prof. A. Schilling . . . . .	115
16.7 Research group of Prof. U. Straumann . . . . .	116
16.8 H1 Publications . . . . .	120
16.9 Research group of Prof. P. Truöl . . . . .	122
